```
(base) vishnu@pop-os:~$
```

```
(base) vishnu@pop-os:~$ traceroute
```

Usage:

traceroute [-4dFITnreAUDV] [-f first_ttl] [-g gate,...] [-i

device] [-m max_ttl] [-N squeries] [-p port] [-t tos] [-l

flow_label] [-w MAX,HERE,NEAR] [-q nqueries] [-s src_addr] [-z

sendwait] [--fwmark=num] host [packetlen]

Options:

-4 Use IPv4

-6 Use IPv6

-d --debug Enable socket level debugging

-F --dont-fragment Do not fragment packets

-f first_ttl --first=first_ttl

Start from the first_ttl hop (instead from

1)

-g gate,... --gateway=gate,...

Route packets through the specified gateway
(maximum 8 for IPv4 and 127 for IPv6)

-I --icmp	Use ICMP ECHO for tracerouting
-T --tcp	Use TCP SYN for tracerouting (default port is 80)
-i device --interface=device	Specify a network interface to operate with
-m max_ttl --max-hops=max_ttl	Set the max number of hops (max TTL to be reached). Default is 30
-N squeries --sim-queries=squeries	Set the number of probes to be tried simultaneously (default is 16)
-n names	Do not resolve IP addresses to their domain
-p port --port=port	Set the destination port to use. It is either
	initial udp port value for "default" method (incremented by each probe, default is 33434), or
	initial seq for "icmp" (incremented as well,
	destination default from 1), or some constant
	port for other methods (with default of 80 for
	"tcp", 53 for "udp", etc.)
-t tos --tos=tos	Set the TOS (IPv4 type of service) or TC (IPv6
	traffic class) value for outgoing packets
-l flow_label --flowlabel=flow_label	Use specified flow_label for IPv6 packets
-w MAX,HERE,NEAR --wait=MAX,HERE,NEAR	Wait for a probe no more than HERE (default 3)
	times longer than a response from the same
hop,	or no more than NEAR (default 10) times
than some	next hop, or MAX (default 5.0) seconds
(float	point values allowed too)
-q nqueries --queries=nqueries	Set the number of probes per each hop.
Default is	3
-r	Bypass the normal routing and send directly
to a	host on an attached network
-s src_addr --source=src_addr	Use source src_addr for outgoing packets
-z sendwait --sendwait=sendwait	Minimal time interval between probes
(default 0).	If the value is more than 10, then it
specifies a	number in milliseconds, else it is a number
of	seconds (float point values allowed too)

```

    -e --extensions          Show ICMP extensions (if present),
including MPLS
    -A --as-path-lookups    Perform AS path lookups in routing
registries and
corresponding
addresses
    -M name --module=name    Use specified module (either builtin or
external)
for traceroute operations. Most methods
have
their shortcuts (`-I' means `-M icmp' etc.)
    -O OPTS,... --options=OPTS,...
Use module-specific option OPTS for the
traceroute module. Several OPTS allowed,
separated by comma. If OPTS is "help",
print info
about available options
    --sport=num             Use source port num for outgoing packets.
Implies
`-N 1'
    --fwmark=num            Set firewall mark for outgoing packets
    -U --udp                Use UDP to particular port for tracerouting
(instead of increasing the port per each
probe),
default port is 53
    -UL                     Use UDPLITE for tracerouting (default dest
port
is 53)
    -D --dccp               Use DCCP Request for tracerouting (default
port
is 33434)
    -P prot --protocol=prot Use raw packet of protocol prot for
tracerouting
    --mtu                   Discover MTU along the path being traced.
Implies
`-F -N 1'
    --back                  Guess the number of hops in the backward
path and
print if it differs
    -V --version            Print version info and exit
    --help                  Read this help and exit

```

Arguments:

```

+      host                The host to traceroute to
      packetlen            The full packet length (default is the length of an
IP
header plus 40). Can be ignored or increased to a
minimal
allowed value

```

```

NOTICE: The expiration date displayed in this record is the date the registrar's sponsorship of the domain name registration in the registry is currently set to expire. This date does not necessarily reflect the expiration date of the domain name registrant's agreement with the sponsoring registrar. Users may consult the sponsoring registrar's Whois database to view the registrar's reported date of expiration for this registration.

TERMS OF USE: You are not authorized to access or query our Whois database through the use of electronic processes that are high-volume and automated except as reasonably necessary to register domain names or modify existing registrations; the Data in VeriSign Global Registry Services' ("VeriSign") Whois database is provided by VeriSign for information purposes only, and to assist persons in obtaining information about or related to a domain name registration record. VeriSign does not guarantee its accuracy. By submitting a Whois query, you agree to abide by the following terms of use: You agree that you may use this Data only for lawful purposes and that under no circumstances will you use this Data

to: (1) allow, enable, or otherwise support the transmission of mass unsolicited, commercial advertising or solicitations via e-mail, telephone, or facsimile; or (2) enable high volume, automated, electronic processes that apply to VeriSign (or its computer systems). The compilation, repackaging, dissemination or other use of this Data is expressly prohibited without the prior written consent of VeriSign. You agree not to use electronic processes that are automated and high-volume to access or

query the Whois database except as reasonably necessary to register domain names or modify existing registrations. VeriSign reserves the right to restrict your access to the Whois database in its sole discretion to ensure operational stability. VeriSign may restrict or terminate your access to the Whois database for failure to abide by these terms of use. VeriSign reserves the right to modify these terms at any time.

The Registry database contains ONLY .COM, .NET, .EDU domains and Registrars.

If you wish to contact this domain's Registrant, Administrative, or Technical contact, and such email address is not visible above, you may do so via our web form, pursuant to ICANN's Temporary Specification. To verify that you are not a robot, please enter your email address to receive a link to a page that facilitates email communication with the relevant contact(s).

Web-based WHOIS:
<https://domains.markmonitor.com/whois>

If you have a legitimate interest in viewing the non-public WHOIS details, send your request and the reasons for your request to whoisrequest@markmonitor.com and specify the domain name in the subject line. We will review that request and may ask for supporting documentation and explanation.

The data in MarkMonitor's WHOIS database is provided for information purposes, and to assist persons in obtaining information about or related to a domain name's registration record. While MarkMonitor believes the data to be accurate, the data is provided "as is" with no guarantee or warranties regarding its accuracy.

By submitting a WHOIS query, you agree that you will use this data only for lawful purposes and that, under no circumstances will you use this data to:

- (1) allow, enable, or otherwise support the transmission by email, telephone, or facsimile of mass, unsolicited, commercial advertising, or spam; or
- (2) enable high volume, automated, or electronic processes that send queries, data, or email to MarkMonitor (or its systems) or the domain name contacts (or its systems).

MarkMonitor reserves the right to modify these terms at any time.

By submitting this query, you agree to abide by this policy.
